DETAILED ACTION

Applicants amendment of claim 71, Paper of 9/1/2004, is acknowledged.

Applicants' arguments filed on 9/1/2004 have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. Claims 71 and 72 are still at issue and are present for examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 72 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 72 is rejected as being indefinite because claim 72 states "wherein said cells are ...genetically modified cells". This statement is unclear and confusing given that claim 72 depends from claim 71 which recites that none of said cells are genetically modified. Applicants comments regarding claim 72 in light of applicants amendment of claim 71 in which applicants state that the limitation of "genetically modified cells" in claim 72 refers to "any genetic modification other than to express heparanase" are appreciated, however not found sufficient to alleviate the confusion which would be the result of such an amendment of claim 71.

Art Unit: 1652

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 71 and 72 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants amendment of claim 71 (claim 72 dependent from) which recites "...none of said somatic mammalian cells in said preparation is genetically modified to express heparanase" is not supported by the specification at the time of filing and thus considered new matter.

Applicants discussion regarding the "Ample support" for such an amendment is acknowledged, however, not found persuasive, because while it is appreciated that applicants do describe species and examples of encompassed biological preparations that are not necessarily genetically modified cells, applicants do not have support for the negative limitation that none of said cells is genetically modified.

Claim Rejections - 35 USC § 102

The rejection of claims 71 and 72 under 35 U.S.C. 102(e) as being anticipated by Pecker et al. (U.S. Patent No. 5,968,822) is hereby withdrawn based on applicants amendment of 9/1/2004.
